"Baking+" · The Future Holds Even Greater Possibilities

The China Bakery Exhibition is the pioneer of the China bakery industry exhibition. After forming a strategic partnership with Informa Markets in 2021, **the exhibition has leveraged its nearly 30 years of deep industry resources to integrate the extensive food service and food market advantages.** Through offline exhibitions, large-scale summit forums, roadshows and online cloud exhibitions and e-commerce projects, it has expanded the "baking+" ecosystem, helping the global baking industry break down barriers and accelerate both vertical deepening and horizontal cross-sector collaboration.

The 28th China Bakery Exhibition, co-hosted by the All-China Bakery Association and Guangzhou Sinobake International Exhibition Co., Ltd., will be held grandly from **May 10 to 12, 2025, at Guangzhou-Canton Fair Complex Area D + Area A.** Once again, it will join forces with the 2025 Guangzhou International Hospitality Equipment & Foodservice Expo, the 2025 FHC South China Global Food Trade Show (Guangzhou) and the Guangzhou International Franchise Exhibition 2025. The grand year for baking, the future holds even greater possibilities! The China Bakery Exhibition is committed to providing a larger platform for information and trade exchange services for enterprises across the upstream and downstream industry chains of China's baking + food & beverage sectors.

Multiple Exhibitions Join Forces Again, Expanding the Baking + Food & Beverage Ecosystem

Exhibitor Testimonials

This year's exhibition showcased the growing trends of baked goods becoming more staple and snack-oriented. Through face-to-face communication and interaction, we demonstrated our company's strengths and advantages, broadening our market channels. The China Bakery Exhibition is not only a platform for displaying the latest products but also a crucial venue for understanding market demands and enhancing competitiveness.

At this exhibition, we observed that with the growing consumer focus on health, there is a need to continually optimize and upgrade our equipment based on customer demands. The event provided us with a crucial opportunity to gain insights into market trends and engage with clients, which is vital for our development.

This year's China Bakery Exhibition showcased a robust recovery trend in the baking industry. We are very grateful to the All-China Bakery Association for providing such a platform, which not only allowed us to better understand market trends and consumer demands but also facilitated communication between industry peers.

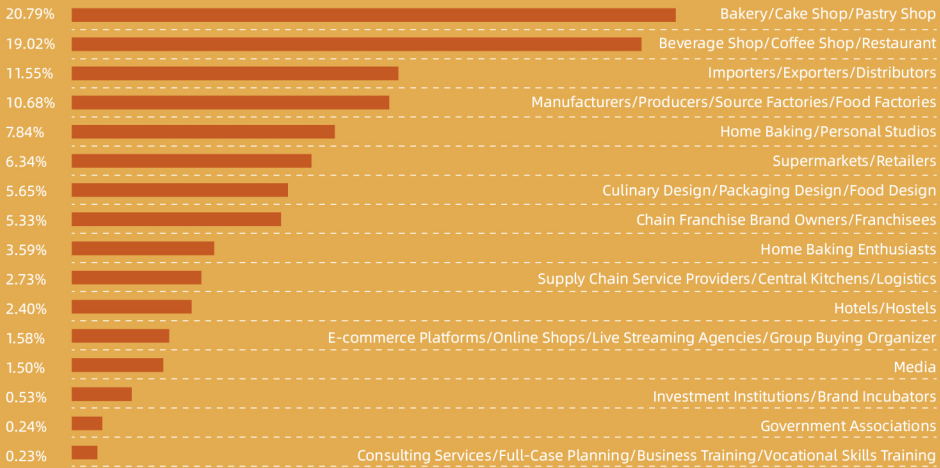

At this year's China Bakery Exhibition, I deeply felt the vibrant development of the industry: high attendance, professional expertise and strong confidence! Even in the face of economic downturns, the baking industry remains confident. We firmly believe that people's aspirations for a better life have never changed and that tomorrow will certainly be better.

The Industry Attribute Distribution of the Visitors

The 2024 exhibition attracts a large number of professional buyers from the baking and food service industry as well as the raw materials supply chain to visit and make purchases.

Gathering High-Quality Buyers from All Channels to Seize Business Opportunities in the South China Market
